I. CITING REFERENCES

A. References in Text

References need not be cited in the text. When they are, they appear on the line, in square brackets, inside the punctuation. Grammatically, they may be treated as if they were footnote numbers, e.g.:

as shown by Brown [4], [5]; as mentioned earlier [2], [4]–[7], [9]; Smith [4] and Brown and Jones [5]; Wood *et al.* [7]

NOTE: Use *et al.* when three or more names are given for a reference cited in the text.

or as nouns:

as demonstrated in [3]; according to [4] and [6]–[9].

B. References Within a Reference

Check the reference list for *ibid.* or *op. cit.* These refer to a previous reference and should be eliminated from the reference section. In text, repeat the earlier reference number and renumber the reference section accordingly. If the *ibid.* gives a new page number, or other information, use the following forms:

[3, Th. 1]; [3, Lemma 2]; [3, pp. 5–10]; [3, eq. (2)]; [3, Fig. 1]; [3, Appendix I]; [3, Sec. 4.5]; [3, Ch. 2, pp. 5–10]; [3, Algorithm 5].

NOTE: Editing of references may entail careful renumbering of references, as well as the citations in text. Always query the author when renumbering references and text citations.

II. STYLE

Reference numbers are set flush left and form a column of their own, hanging out beyond the body of the reference. The reference numbers are on the line, enclosed in square brackets. In all references, the given name of the author or editor is abbreviated to the initial only and precedes the last name. Use commas around Jr., Sr., and III in names. IEEE publications must list names of all authors, up to six names. If there are more than six names listed, use the primary author's name followed by *et al.* For non-IEEE publications, *et al*. may be used if names are not provided. All references, except those ending with URLs, will end with a period, including those with a DOI. If a reference contains both a DOI or accessed date, as well as a URL, place the DOI or accessed date first and the URL at the end. Note that when citing IEEE Transactions, if the issue number or month is not available, research IEEEXplore to update the information. For any reference that cites two months for the same issue, the two months should be separated by a slash (e.g., Jul./Aug.), followed by the year of publication. References may not include all information; please obtain and include relevant information. Do not combine references. There must be only one reference with each number. If there is a URL included with the print reference, it can be included at the end of the reference (see style for online references).

B. Conferences and Conference Proceedings

The general form for citing conference proceedings is to list the author and title of the paper, followed by the name of the conference using the following abbreviations as well as those found in the "Common Abbreviations of Words in References" list.

Annals	Ann.	Proceedings	Proc.
Annual	Annu.	Record	Rec.
Colloquium	Colloq.	Symposium	Symp.
Conference	Conf.	Technical Digest	Tech. Dig.
Congress	Congr.	Technical Paper	Tech. Paper
Convention	Conv.	Workshop	Workshop
Digest	Dig.	First	1st
Exposition	Expo.	Second	2nd
International	Int.	Third	3rd
Meeting	Meeting	Fourth/nth...	4th/nth…
National	Nat.		

Write out all the remaining words, but omit most articles and prepositions like "of the" and "on." That is, *Proceedings of the 1996 Robotics and Automation Conference* becomes *Proc. 1996 Robot. Automat. Conf.*
NOTE: All published conference or proceedings papers have page numbers.

Conference Paper (Paper Presented at a Conference)

Basic Format:

- J. K. Author, "Title of paper," presented at the Abbreviated Name of Conf., City of Conf., Abbrev. State, Country, Month and day(s), year, Paper number.

Examples:

- D. Caratelli, M. C. Viganó, G. Toso, and P. Angeletti, "Analytical placement technique for sparse arrays," presented at the 32nd ESA Antenna Workshop, Noordwijk, The Netherlands, Oct. 5–8, 2010.
- J. G. Kreifeldt, "An analysis of surface-detected EMG as an amplitude-modulated noise," presented at the 1989 Int. Conf. Med. Biol. Eng., Chicago, IL, USA, Nov. 9–12, 1989.
- G. W. Juette and L. E. Zeffanella, "Radio noise currents on short sections on bundle conductors," presented at the IEEE Summer Power Meeting, Dallas, TX, USA, Jun. 22–27, 1990, Paper 90 SM 690-0 PWRS.
- J. Arrillaga and B. Giessner, "Limitation of short-circuit levels by means of HVDC links," presented at the IEEE Summer Power Meeting, Los Angeles, CA, USA, Jul. 12–17, 1990, Paper 70 CP 637.

Conference Proceedings in Print (Paper Presented at a Conference)

The general form for citing conference proceedings is to list the author and title of the paper, followed by the name of the conference *in italics* using standard abbreviations. Write out all the remaining words, but omit most articles and prepositions like "of the" and "on." That is, *Proceedings of the 1996 Robotics and Automation Conference* becomes *Proc. 1996 Robot. Automat. Conf.* If an ordinal number is in the conference name, use the numerical form instead of spelling it out (e.g., "1st" instead of "First"). Include the location if given. For U.S. locations, "USA" must be included after city and state.

Basic Format:

- J. K. Author, "Title of paper," in *Abbreviated Name of Conf.*, (location of conference is optional), (Month and day(s) if provided) year, pp. *xxx-xxx.*

Examples:

- A. Amador-Perez and R. A. Rodriguez-Solis, "Analysis of a CPW-fed annular slot ring antenna using DOE," in *Proc. IEEE Antennas Propag. Soc. Int. Symp.*, Jul. 2006, pp. 4301–4304.
- G. R. Faulhaber, "Design of service systems with priority reservation," in *Conf. Rec. 1995 IEEE Int. Conf. Commun.*, pp. 3–8. **** If the year is given in the conference title, it may be omitted from the end of the reference as shown here.****

D. Datasets

FORCE11 Data Citation Principles

IEEE follows the FORCE11 Data Citation Principles. These principles are as follows (per https://www.force11.org/datacitationprinciples):

1. **Importance:** Data should be considered legitimate, citable products of research. Data citations should be accorded the same importance in the scholarly record as citations of other research objects, such as publications.
2. **Credit and Attribution:** Data citations should facilitate giving scholarly credit and normative and legal attribution to all contributors to the data, recognizing that a single style or mechanism of attribution may not be applicable to all data.
3. **Evidence:** In scholarly literature, whenever and wherever a claim relies upon data, the corresponding data should be cited.
4. **Unique Identification:** A data citation should include a persistent method for identification that is machine actionable, globally unique, and widely used by a community.
5. **Access:** Data citations should facilitate access to the data themselves and to such associated metadata, documentation, code, and other materials, as are necessary for both humans and machines to make informed use of the referenced data.
6. **Persistence:** Unique identifiers, and metadata describing the data, and its disposition, should persist—even beyond the lifespan of the data they describe.
7. **Specificity and Verifiability:** Data citations should facilitate identification of, access to, and verification of the specific data that support a claim. Citations or citation metadata should include information about provenance and fixity sufficient to facilitate verifying that the specific timeslice, version and/or granular portion of data retrieved subsequently is the same as was originally cited.
8. **Interoperability and Flexibility:** Data citation methods should be sufficiently flexible to accommodate the

variant practices among communities, but should not differ so much that they compromise interoperability of data citation practices across communities.

Note: Reproduced (including references therein) from M. Martone, Ed. "Data Citation Synthesis Group: Joint Declaration of Data Citation Principles." San Diego, CA, USA: FORCE11, 2014. [Online]. Available: https://www.force11.org/group/joint-declaration-data-citation-principles-final

When providing reference details as much information as available should be provided (italics denote that metadata would benefit from the details, although it is not required for reference listing):

- **Published mixed data/software package:** author(s), name, unique identifier, location/repository, release date, *license, description, keywords.*

The essential components of a citation to a dataset are the following: Author names of each individual or organizational entity responsible for the creation of the dataset; the date published or disseminated [year and full date (if available)]; the complete title of the dataset, including the edition or version number, if applicable; publisher and/or distributor; and electronic location or identifier (URL or DOI if applicable). Append the date retrieved if the title and locator are not specific to the exact instance of the data you used.

Basic Format:

J. Patent

Retain or request the day of the month when referencing a patent.

NOTE: Use "issued date" if several dates are given.

Basic Format:

- J. K. Author, "Title of patent," U.S. Patent *x xxx xxx*, Abbrev. Month, day, year.
- J. K. Author, "Title of patent," Country Patent *xxx*, Abbrev. Month, day, year.

Examples:

- J. P. Wilkinson, "Nonlinear resonant circuit devices," U.S. Patent 3 624 125, Jul. 16, 1990.
- T. Mei and T. Yang, "Circuit and method for average–current regulation of light-emitting diodes," U.S. Patent 7 898 187 B1, 2011, Mar. 1, 2012.
- W. W. Black and A. Clavin, "Dipole augmented slot radiating element," U.S. Patent 3594806, Jul. 1971.
- S. P. Voinigescu *et al*., Direct *m*-ary quadrature amplitude modulation (QAM) operating in saturated power mode," U.S. Patent Appl. 20110013726A1, Jan. 20, 2011.
- K. Klionovski, "Broadband dual-band microstrip antenna," (in Russian), RU Patent Utility Model 167296, Dec. 27, 2016.

Patent Online

Basic Format:

- Name of the invention, by inventor's name. (year, month day). Patent Number [Type of medium]. Available: site/path/file

Examples:

- Musical toothbrush with adjustable neck and mirror, by L. M. R. Brooks. (1992, May 19). Patent D 326 189 [Online]. Available: NEXIS Library: LEXPAT File: DESIGN
- Screwless clip mounted computer drive, by D. Williams. (2005, Apr. 26). U.S. Patent 6,885,550 [Online]. Available: http://patft.uspto.gov/netacgi/6,885,550

K. Periodicals

Periodicals

Refer to the section on Common Abbreviations of Words in References for non-IEEE titles. Note that periodical titles of only one word should not be abbreviated, but fully spelled out, e.g., *Science* and *Nature*.

Prior to 1988, the volume number of IEEE Transactions/Journals carried the acronym of the journal. For example, an issue of the IEEE TRANSACTIONS ON AUTOMATIC CONTROL would read: *IEEE Trans. Automat. Contr.,* vol. AC-26, no. 1, pp. 1–34, Jan. 1981. When referencing IEEE Transactions, both the issue number and month are included upon verification of frequency and starting month. DOIs are included, when provided by the author.

NOTE: The only exception to this rule is PROCEEDINGS OF THE IEEE, which never carried an acronym on the masthead.

Basic Format:

- J. K. Author, "Name of paper," *Abbrev. Title of Periodical*, vol. *x,* no. *x,* pp. *xxx-xxx,* Abbrev. Month, year.
- J. K. Author, "Name of paper," *Abbrev. Title of Periodical*, vol. *x,* no. *x,* pp. *xxx-xxx,* Abbrev. Month, year, doi: *xxx*.

Examples:

NOTE: Handle it exactly as any other reference with no difference.

Periodical With Article ID

Basic Format:

- J. K. Author, "Name of paper," *Abbrev. Title of Periodical*, vol. *x,* no. *x,* Abbrev. month, year, Art. no. *xxx*.

Examples:

- J. Zhang and N. Tansu, "Optical gain and laser characteristics of InGaN quantum wells on ternary InGaN substrates," *IEEE Photon. J.*, vol. 5, no. 2, Apr. 2013, Art no. 2600111.

Periodical With DOI

Basic Format:

- J. K. Author, "Name of paper," *Abbrev. Title of Periodical*, vol. *x,* no. *x,* pp. *xxx–xxx,* Abbrev. month, year, doi: *xxx*.

Example:

- M. M. Chiampi and L. L. Zilberti, "Induction of electric field in human bodies moving near MRI: An efficient BEM computational procedure," *IEEE Trans. Biomed. Eng.*, vol. 58, no. 10, pp. 2787–2793, Oct. 2011, doi: 10.1109/TBME.2011.2158315.

Periodical in Early Access

Note: Once an article is in the form of advanced online access at the publisher, cite this version, and not the ArXiv version. The online access is the final version of record. Include the title of the journal, the date of record, and the doi. The doi is essential in the reference information, as this will not change.

Basic Format:

- J. K. Author, "Name of paper," *Abbrev. Title of Periodical*., Abbrev. month, year. doi: *xxx*.

Example:

- F. Vatta, A. Soranzo, and F. Babich, "More accurate analysis of sum-product decoding of LDPC codes using a Gaussian approximation," *Commun. Lett.*, early access. doi: 10.1109/TBME.2011.2158315.

Periodical in Other Language

Basic Format:

- J. K. Author, "Name of paper," (in Language), *Abbrev. Title of Periodical*, vol. *x,* no. *x,* Abbrev. month, year, Art. no. *xxx*.

Examples:

- E. P. Wigner, "On a modification of the Rayleigh–Schrodinger perturbation theory," (in German), *Math. Naturwiss. Anz. Ungar. Akad. Wiss.*, vol. 53, p. 475, 1935.

L. Reports

The general form for citing technical reports is to place the name and location of the company or institution after the author and title and to give the report number and date at the end of the reference.

Basic Format:

- J. K. Author, "Title of report," Abbrev. Name of Co., City of Co., Abbrev. State, Country, Rep. *xxx*, year.

Examples:

- E. E. Reber, R. L. Michell, and C. J. Carter, "Oxygen absorption in the earth's atmosphere," Aerospace Corp., Los Angeles, CA, USA,Tech. Rep. TR-0200 (4230-46)-3, Nov. 1988.

M. Software

Note: IEEE follows the Force 11 Citation Principles. These principles are as follows (per https://www.force11.org/):

1. **Importance:** Software should be considered a legitimate and citable product of research. Software citations should be accorded the same importance in the scholarly record as citations of other research products, such as publications and data; they should be included in the metadata of the citing work, for example in the reference list of a journal article, and should not be omitted or separated. Software should be cited on the same basis as any other research product such as a paper or a book, that is, authors should cite the appropriate set of software products just as they cite the appropriate set of papers.
2. **Credit and Attribution:** Software citations should facilitate giving scholarly credit and normative, legal attribution to all contributors to the software, recognizing that a single style or mechanism of attribution may not be applicable to all software.
3. **Evidence:** In scholarly literature, whenever and wherever a claim relies upon data, the corresponding data should be cited.
4. **Unique Identification:** A software citation should include a method for identification that is machine actionable, globally unique, interoperable, and recognized by at least a community of the corresponding domain experts, and preferably by general public researchers.
5. **Persistence:** Unique identifiers and metadata describing the software and its disposition should persist – even beyond the lifespan of the software they describe.
6. **Accessibility:** Software citations should facilitate access to the software itself and to its associated metadata, documentation, data, and other materials necessary for both humans and machines to make informed use of the referenced software.
7. **Specificity:** Software citations should facilitate identification of, and access to, the specific version of software that was used. Software identification should be as specific as necessary, such as using version numbers, revision numbers, or variants such as platforms.
8. **Interoperability and Flexibility:** Data citation methods should be sufficiently flexible to accommodate the variant practices among communities, but should not differ so much that they compromise interoperability of data citation practices across communities.

***When providing reference details as much information as noted below should be provided (italics denote that metadata would benefit from the details, although it is not required for reference listing):

1) *Use software for papers:* author(s), software name, location/repository, version number, release date, unique identifier. *Use software for papers:* author(s), software name, location/repository, version number, release date, unique identifier.
2) *Use software in/with new software:* author(s), software name, location/repository, version number, release date, unique identifier*, software licensure, description.*
3) *Contribute to software:* author(s), software name, location/repository, version number, release date, unique identifier, *contributor role, software license, description.*
4) *Determine use/citations of software:* software name, unique identifier, indexed citations.

5) *Get credit for software development:* author(s), software name, location/repository, release date, unique identifier*, contributor role, indexed citations.*
6) *"Reproduce analysis":* software name, location/repository, version number, release date, unique identifier, *software license, description.*
7) *Find software to implement task:* author(s), software name, location/repository, location/repository, unique identifier, indexed citations*, software license, description, keywords.*
8) *Publish software paper:* author(s), software name, location/repository, version number, release date, unique identifier.
9) *Publish papers that cite software:* author(s), software name, location/repository, version number, release date, unique identifier, indexed citations.
10) *Build catalog of software:* author(s), software name, location/repository, version number, release date, unique identifier, indexed citations, *software license, description, keywords.*
11) *Build software catalog/registry:* author(s), software name, location/repository, unique identifier, *description, keywords.*
12) *Show scientific impact of holdings:* software name, unique identifier*,* indexed citations.
13) *Show how funded software has been used:* software name, unique identifier*,* indexed citations.
14) *Evaluate contributions of researcher:* author(s), unique identifier, release date, indexed citations, *contributor role.*
15) *Store software entry:* author(s), software name, unique identifier, location/repository, release date, indexed citations, *description, keywords.*
16) *Published mixed data/software package:* author(s), software name, unique identifier, location/repository, release date, *software license, description, keywords.*

Example:

- U.S. House. 102nd Congress, 1st Session. (1991, Jan. 11). *H. Con. Res. 1, Sense of the Congress on Approval of Military Action*. [Online]. Available: LEXIS Library: GENFED File: BILLS

Government Online

Basic Format:

- Legislative body. Number of Congress, Session. (year, month day). *Number of bill or resolution*, *Title*. [Type of medium]. Available: site/path/file

Example:

- U.S. House. 102nd Congress, 1st Session. (1991, Jan. 11). *H. Con. Res. 1, Sense of the Congress on Approval of Military Action*. [Online]. Available: LEXIS Library: GENFED File: BILLS

Q. Unpublished

The two most common types of unpublished references are private communications and papers still in preparation.

Basic Format:

- J. K. Author, private communication, Abbrev. Month, year.
- J. K. Author, "Title of paper," unpublished.

Examples:

- A. Harrison, private communication, May 1995.
- B. Smith, "An approach to graphs of linear forms," unpublished.
- A. Brahms, "Representation error for real numbers in binary computer arithmetic," IEEE Computer Group Repository, Paper R-67-85.
- S. Urazhdin, N. O. Birge, W. P. Pratt Jr., and J. Bass, "Current-driven magnetic excitations in permalloy-based multilayer nanopillars," 2003, *arXiv:0303149*.

R. Websites

The most basic entry for a website consists of the author name(s), page title, website title, web address, and date accessed:

First Name Initial(s) Last Name. "Page Title." Website Title. Web Address (retrieved Date Accessed).

J. Smith. "Obama inaugurated as President." CNN.com. http://www.cnn.com/POLITICS/01/21/obama_inaugurated/index.html (accessed Feb. 1, 2009).

The first author's name should be first initial(s) and then the last name and a period. Titles and affiliations associated with the author should be omitted. A suffix, such as a roman numeral or Jr./Sr., should appear after the author's given name, preceded by a comma.

For a page with two or more authors, list them in the order as they appear on the website. Separate author names by a comma.

J. Smith and J. Doe. "Obama inaugurated as President." CNN.com. http://www.cnn.com/POLITICS/01/21/obama_inaugurated/index.html (accessed Feb. 1, 2009).

Include the web address of the page. Next, place the text "accessed" and the date on which you accessed the website (written in the format of "month day, year") in parentheses. Conclude the citation with a period after the parentheses.

For social media websites, please use the following style.

P. Costanzo, "Clemson Orange Uniforms Are Messing With the Color on My TV. And Apparently Messing With the ND Offense, Too." Twitter. https://twitter.com/PaulCostanzo/status/817826295707041793 (accessed Apr. 19,

2021).

For informal websites (such as home page or fan websites) or websites without formal titles, use descriptive phrases in your citation in place of page or website titles.

III. NOTES ABOUT ONLINE REFERENCES

The guidelines for citing electronic information as offered here are in modified illustration of the adaptation by the International Standards Organization (ISO) documentation system and the American Psychological Association style.

There are various options for including a URL in a reference. Follow the order of details and whether a period needs to be placed at the end of the reference. The style of the accessed date is "Accessed: Abbrev. month and day, year." The placement of the accessed date within the reference should match how it is provided in the final author-submitted version.

Note. URLs are not hyperlinked in the proof.

- Accessed date. [Online]. Available: URL, DOI (add period at end).
- Accessed date. [Online]. Available: URL (no period at end)
- Accessed date, DOI (add period at end).
- URL, DOI (add period at end).
- (no accessed date), DOI (add period at end unless hyperlink).
- URL (no period at end)

Guidelines for Breaking URLs:

- Break after slash or double slash.
- Break "before" the hyphen that is part of an address, but do not break after; do not add hyphens or spaces; do not let addresses hyphenate.
- Break "before" a tilde (~), a hyphen, an underscore (_), a question mark, or a percent (%) symbol.
- Break before or after an equal sign or an ampersand (follow the same rule for the "at" (@) symbol).

IV.USEFUL ABBREVIATIONS IN REFERENCES

Tips for abbreviating periodical titles in references:

- Words ending in "-ology" can be ended after the "-ol."
  e.g., *Gastroenterology --> Gastroenterol.; Endocrinology --> Endocrinol.*
- Words ending in "-graphy" can be ended after the "-gr."
  e.g., *Oceanography --> Oceanogr.; Crystallography --> Crystallgr.*
- Compound words can be ended using the abbreviation of the last word.
  e.g., *Bioengineering --> Bioeng.; Nanobioscience --> Nanobiosci.*
- Some abbreviations may apply to more than one word, e.g., "Mathematical" and "Mathematics" are both abbreviated as "Math."; "Medical" and "Medicine" are both abbreviated as "Med."
- If an abbreviation is not included and cannot be abbreviated according to the general guidelines above, please spell out the word.
