E-portfolio Checklist

An e-portfolio is your digital footprint—quietly confident, purpose-driven, and strategically curated. It should communicate who you are, what you do well, and where you intend to go.

The following resources offer free, easy-to-use options to create e-portfolios. They also have sample portfolios that you can look at.

- **WordPress**
- **https://sites.google.com/**
- **https://www.canva.com/**

What to include in e-portfolio

- Professional Photo & Short Bio
  - A clear, formal photo
  - A concise bio highlighting your academic identity and aspirations
- Video Introduction
  - A brief, well-structured personal introduction (details below)
- Resume (separate page/tab)
  - Updated, achievement-oriented, and tailored to your discipline
- Skills, Co-curricular Activities & Experiences (separate page/tab)
  - Technical and soft skills
  - Projects, internships, volunteering, leadership roles

Apart from these, you may add more/customize depending on the sills and experience you would like to offer.

E-portfolio Video Introduction

Your video is your opening statement—brief, authentic, and impactful.

You may include the following elements:

- **Greetings**
- **Full Name**

- **Background (where you are from)**
- **Current Status**
  (academic level / professional standing)
- **Key Attributes**
  (strengths, values, or defining traits)
- **Latest Academic Qualification**
- **Area of Interest / Research Interest**
- **Skills**
  (software, technical, communication, leadership)
- **Projects / Internships / Achievements**
  (recent or most significant)
- **Career Vision**
  (short-term direction and long-term goals)

Duration & Delivery Standards

- **Length: 1–2 minutes**
- **Tone: Clear, confident, and professional**
- **Approach:**
  - **Do not memorize word-for-word**
  - **Use brief notes during practice if needed**
  - **Focus on clarity, not perfection**

Sample E-Portfolio Video Introduction Script (Do not copy it)

Hello,

My name is Md. Arif Hasan, and I am from Dhaka, Bangladesh. I am currently an undergraduate student in Computer Science and Engineering at the American International University–Bangladesh (AIUB), where I am developing a strong foundation in computing, problem-solving, and applied technology.

I would describe myself as a disciplined, analytical, and goal-oriented learner who values innovation and continuous improvement. Academically, I am pursuing my Bachelor's degree in

CSE, and my primary areas of interest include software development, data structures, and artificial intelligence, particularly their real-world applications.

In terms of skills, I am familiar with C, C++, Java, and Python, and I have hands-on experience with basic web technologies and database management systems. Alongside technical skills, I have developed effective communication and teamwork abilities through group projects and academic presentations. I have worked on academic projects such as a database-driven application and a basic software solution, which strengthened my logical thinking and coding practices.

Looking ahead, my short-term goal is to grow as a competent software developer, and in the long run, I aspire to contribute to innovative technology-driven solutions while continuously upgrading my skills in emerging fields.

Thank you for taking the time to watch my video introduction. I look forward to learning opportunities that allow me to grow both academically and professionally.

Best wishes!
